ELSEVIER

Comput. Methods Appl. Mech. Engrg. 159 (1998) 405–406

Computer methods in applied mechanics and engineering

Contents Volume 159

Volume 159, Nos. 1–2, 1 July 1998

A general framework for the numerical solution of problems in finite elasto-plasticity
P. Papadopoulos and J. Lu 1

A posteriori error estimation of steady-state finite element solutions of the Navier–Stokes equations by a subdomain residual method
H. Jin and S. Prudhomme 19

Optimal design of periodic piezocomposites
E.C.N. Silva, J.S.O. Fonseca and N. Kikuchi 49

Investigation of the interactions between the numerical and the modeling errors in the Homogenized Dirichlet Projection Method
N. Moës, J.T. Oden and T.I. Zohdi 79

Elastoplastic consolidation at finite strain. Part 2: Finite element implementation and numerical examples
R.I. Borja, C. Tamagnini and E. Alarcón 103

Incremental unknowns, multilevel methods and the numerical simulation of turbulence
T. Dubois, F. Jauberteau and R. Temam 123

Announcement: APCOM '99 191

Volume 159, Nos. 3–4, 8 July 1998

A study of strain localization in a multiple scale framework—The one-dimensional problem
K. Garikipati and T.J.R. Hughes 193

A formulation of finite elastoplasticity based on dual co- and contra-variant eigenvector triads normalized with respect to a plastic metric
C. Miehe 223

A high-order streamline Godunov scheme for steady supersonic/hypersonic equilibrium flows
J.-Y. Yang, Y.-H. Tang and S.-T. Lee 261

Numerical modelling of large deformation in metal powder forming
R.W. Lewis and A.R. Khoei 291

Branched channel free-streamlines
W.C. Hassenpflug 329

Unit-impulse response of unbounded medium by scaled boundary finite-element method
J.P. Wolf and C. Song 355

Modeling via differential quadrature method: Three-dimensional solutions for rectangular plates
K.M. Liew and T.M. Teo 369

Numerically robust 3-D finite element Reynolds Averaged Navier–Stokes solver for the study of turbulent supersonic external flows
A. Matesanz, A. Velázquez, A. Jiménez and M. Rodríguez 383
